ACCESSORIES **CRF1100L** AFRICA TWIN

Africa Twin reaches new heights

In 2017, the Africa Twin broke the record for the highest altitude reached by a twin-cylinder motorcycle. After 5 days of acclimatisation, a team of 5 riders piloted the Africa Twin onto the slopes of the world's highest active volcano, the Nevado Ojos del Salado – located between Argentina and Chile. Reaching 5,965 metres above sea level, the international team completed its ascent within 24 hours with Africa Twin specially equipped with Termignoni exhaust, revised final sprockets, new Metzeler MC360TM tyres and a range of Honda genuine accessories. Their route took them – in temperatures as low as minus 5 degrees Celsius – through broken asphalt, gravel, mud, sand and finally stretches of ice pockets known as 'penitentes', underlining once again the Africa Twin's credentials as the best-performing off-road motorcycle in its class.
