ACCESSORIES **CB1000R**

The bike that changed everything

After 5 consecutive titles in the World Grand Prix Road Racing Series, Honda decided to withdraw and turn toward its primary target: transfer the technology obtained in competition to develop high-performance consumer machines. After a first attempt with a 450cc, Honda released the CB750 Four in January 1969. The initial production forecast of 1,500 units a year became soon a monthly figure and then jumped to 3,000 units/month. By pushing the boundaries of performance, reliability and easy handling in motorcycles, Honda created a new class of Superbikes. The CB1000R is the modern expression of the same spirit that guides Honda engineers since decades.

The Dream CB750 FOUR, which hit the market in July 1969
